

NOVA: Software Library for Scalable Generation of Sequential Game Strategic Datasets

Max Fierro
Independent Researcher
New York, United States of America
maxfierro@berkeley.edu

Abstract—Placeholder
Index Terms—placeholder

I. INTRODUCTION

- A. *Background*
Placeholder
- B. *Problem Statement*
Placeholder
- C. *Solution Approach*
Placeholder
- D. *Paper Organization*
Placeholder

II. PROBLEM FORMULATION

- A. *Sequential Games*
Placeholder
- B. *State Exploration*
Placeholder
- C. *Retrograde Analysis*
Placeholder
- D. *Dataset Generation*
Placeholder
- E. *Task Parallelization*
Placeholder

III. SYSTEM OVERVIEW

- A. *Design Objectives*
Placeholder
- B. *Library Organization*
Placeholder
- C. *System Implementation*
Placeholder

IV. GAME ABSTRACTION

- A. *Interface Organization*
Placeholder

B. Example Implementation

Placeholder

C. Development Workflow

Placeholder

V. COOPERATIVE SCHEDULER

- A. *Paradigm Selection*
Placeholder.
- B. *Task Lifecycle*
Placeholder.
- C. *Merge Semantics*
Placeholder.
- D. *Five-Phase Tick*
Placeholder.
- E. *Task Cyclicity*
Placeholder.

VI. CRITICAL-DYNAMIC POLICY

- A. *Paradigm Selection*
Placeholder.
- B. *Preemption Decisions*
Placeholder.
- C. *Scheduling Decisions*
Placeholder.
- D. *Theoretical Analysis*
Placeholder.

VII. EVALUATION

- A. *Experimental Setup*
Placeholder.
- B. *Scheduler Performance*
Placeholder.
- C. *Scalability Analysis*
Placeholder.

D. Correctness Validation

Placeholder.

VIII. RELATED WORK

A. Task Scheduling Systems

Placeholder.

B. Game Solving Platforms

Placeholder.

IX. DISCUSSION

A. Limitations

Placeholder.

B. Future Work

Placeholder.
